Sumedh Anand Sontakke

Ming Hsieg Department of Electrical and Computer Engineering McClintock Ave Los Angeles, C.A. 90089

Phone: +1-213-992-1589

Work Email: ssontakk@usc.edu

Personal: sumedh.sontakke2@gmail.com

Current position

Annenberg Fellow, Viterbi School of Engineering, University of Southern California

Areas of specialisation

Machine Learning; Artificial Intelligence; State Representation Learning; Robotics and Autonomous Systems

Appointments held

May-Aug 2018 Summer Undergraduate Research Fellow, California Institute of Technology
Aug-Dec 2018 Bachelor's Thesis Research, Princeton Neuroscience Institute, Princeton University

Summer 2017 Summer Research Fellow, University of Oxford

2015-2018 Chief Data Scientist, Skyline Labs (Facebook-Start funded)

Winter 2016 Data Engineering Intern, PepsiCo India

2015-2016 Data Science Intern, Recommendations, Wynk Music

Education

2019-present PHD in Electrical Engineering, University of Southern California
2015 - 2019 BACHELOR OF TECHNOLOGY in Electrical Engineering, College of Engineering, Pune, India

Grants, honours & awards

Annenberg Fellowship, Viterbi School of Engineering, University of Southern California
Simons Foundation Autism Research SURF Fellow, California Institute of Technology
Summer Research Scholarship, SENS Research Foundation, University of Oxford

Publications & talks

Projects

- Causal State Representation Learning Approximating causal processes using RNNs and directing machine attention using causal processes. Building RL agents that use causality to draw analogies between the processes they encounter in the environment.
- Multitask Learning for Autonomous Driving Collaborating with Prof Jonathan Cohen and Sebastian Musslick at Princeton University to build deep neural nets that generalize across tasks.
- Predicting Human Intelligence from fMRI Collaborating with Prof Ralph Adolphs and Dr Julien Dubois to build machine learning models that predict human intelligence from fMRI imaging.
- Machine Learning for Pharma Collaborating with Dr David Brindley and Prof Chas Bountra at the University of Oxford to build machine learning models that predict the probability of regulatory success of drug candidates resulting in an estimated increase of 82% (7 billion USD) in the revenue generated per 100 drug candidates.
- Predictive Analytics As Chief Data Scientist at Skyline Labs, I successfully led teams which built analytics tools to model risk in healthcare and credit fraud. Also worked on developing Smart City Solutions in public transport (see papers).
- Music Recommendations As a freshman, built the first cross-regional and cross-language music recommendation for India's biggest music streaming app.
